The screenshot shows the Apple Developer Account interface. At the top, there's a navigation bar with links for News, Discover, Design, Develop, Distribute, Support, Account, and a search icon. Below the navigation is a sub-menu for 'Account' with a dropdown showing 'testAccount' and 'TEST TECHNOLOGY CO...'. The main content area has several sections: 'Program resources', 'Email preferences', 'Membership details', 'Device reset date', 'Code-level support', and 'Agreements'. A large callout box highlights the 'Program resources' section, which contains links to 'App Store Connect', 'Certificates, Identifiers & Profiles', and 'Additional resources'. The 'Certificates, Identifiers & Profiles' link is specifically highlighted with a red box around the 'Identifiers' sub-link. To the right of this callout, a dark gray box contains explanatory text and a bulleted list.

< All Identifiers

Register a new identifier

App IDs

Register an App ID to enable your app, app extensions, or App Clip to access available services and identify your app in a provisioning profile. You can enable app services when you create an App ID or modify these settings later.

Services IDs

For each website that uses Sign in with Apple, register a services identifier (Services ID), configure your domain and return URL, and create an associated private key.

Pass Type IDs

Register a pass type identifier (Pass Type ID) for each kind of pass you create (i.e. gift cards). Registering your Pass Type IDs lets you generate Apple-issued certificates which are used to digitally sign and send updates to your passes, and allow your passes to be recognized by Wallet.

Website Push IDs

Register a Website Push Identifier (Website Push ID). Registering your Website Push IDs lets you generate Apple-issued certificates which are used to digitally sign and send push notifications from your website to macOS.

iCloud Containers

Registering your iCloud Container lets you use the iCloud Storage APIs to enable your apps to store data and documents in iCloud, keeping your apps up to date automatically.

App Groups

Registering your App Group allows access to group containers that are shared among multiple related apps, and allows certain additional interprocess communication between the apps.

Merchant IDs

Register your Merchant Identifiers (Merchant IDs) to enable your apps to process transactions for physical goods and services to be used outside of your apps. Generate a Apple Pay Payment Processing certificate for each registered Merchant ID to validate transactions initiated within your app.
